Under Supervisor :

DR/ Mohamed ElRamly.

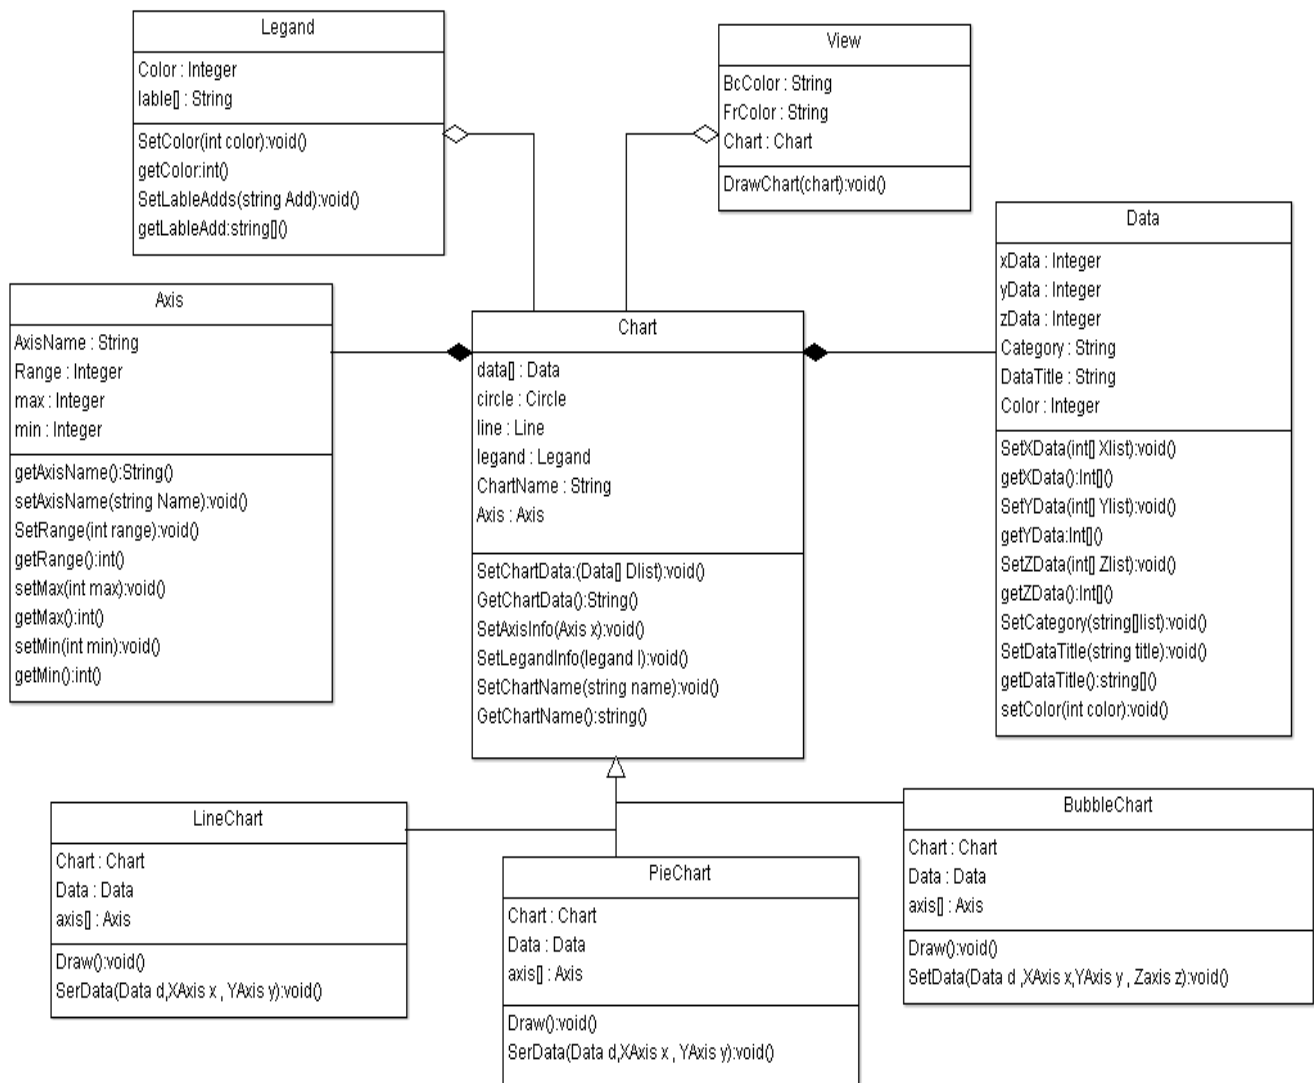

TA/ Omar Khaled.

1.Description:

The purpose of this document to describe our chart java application project that we develop be easy, simple, efficient and easy to run and use.to achieve this target (describing) we draw

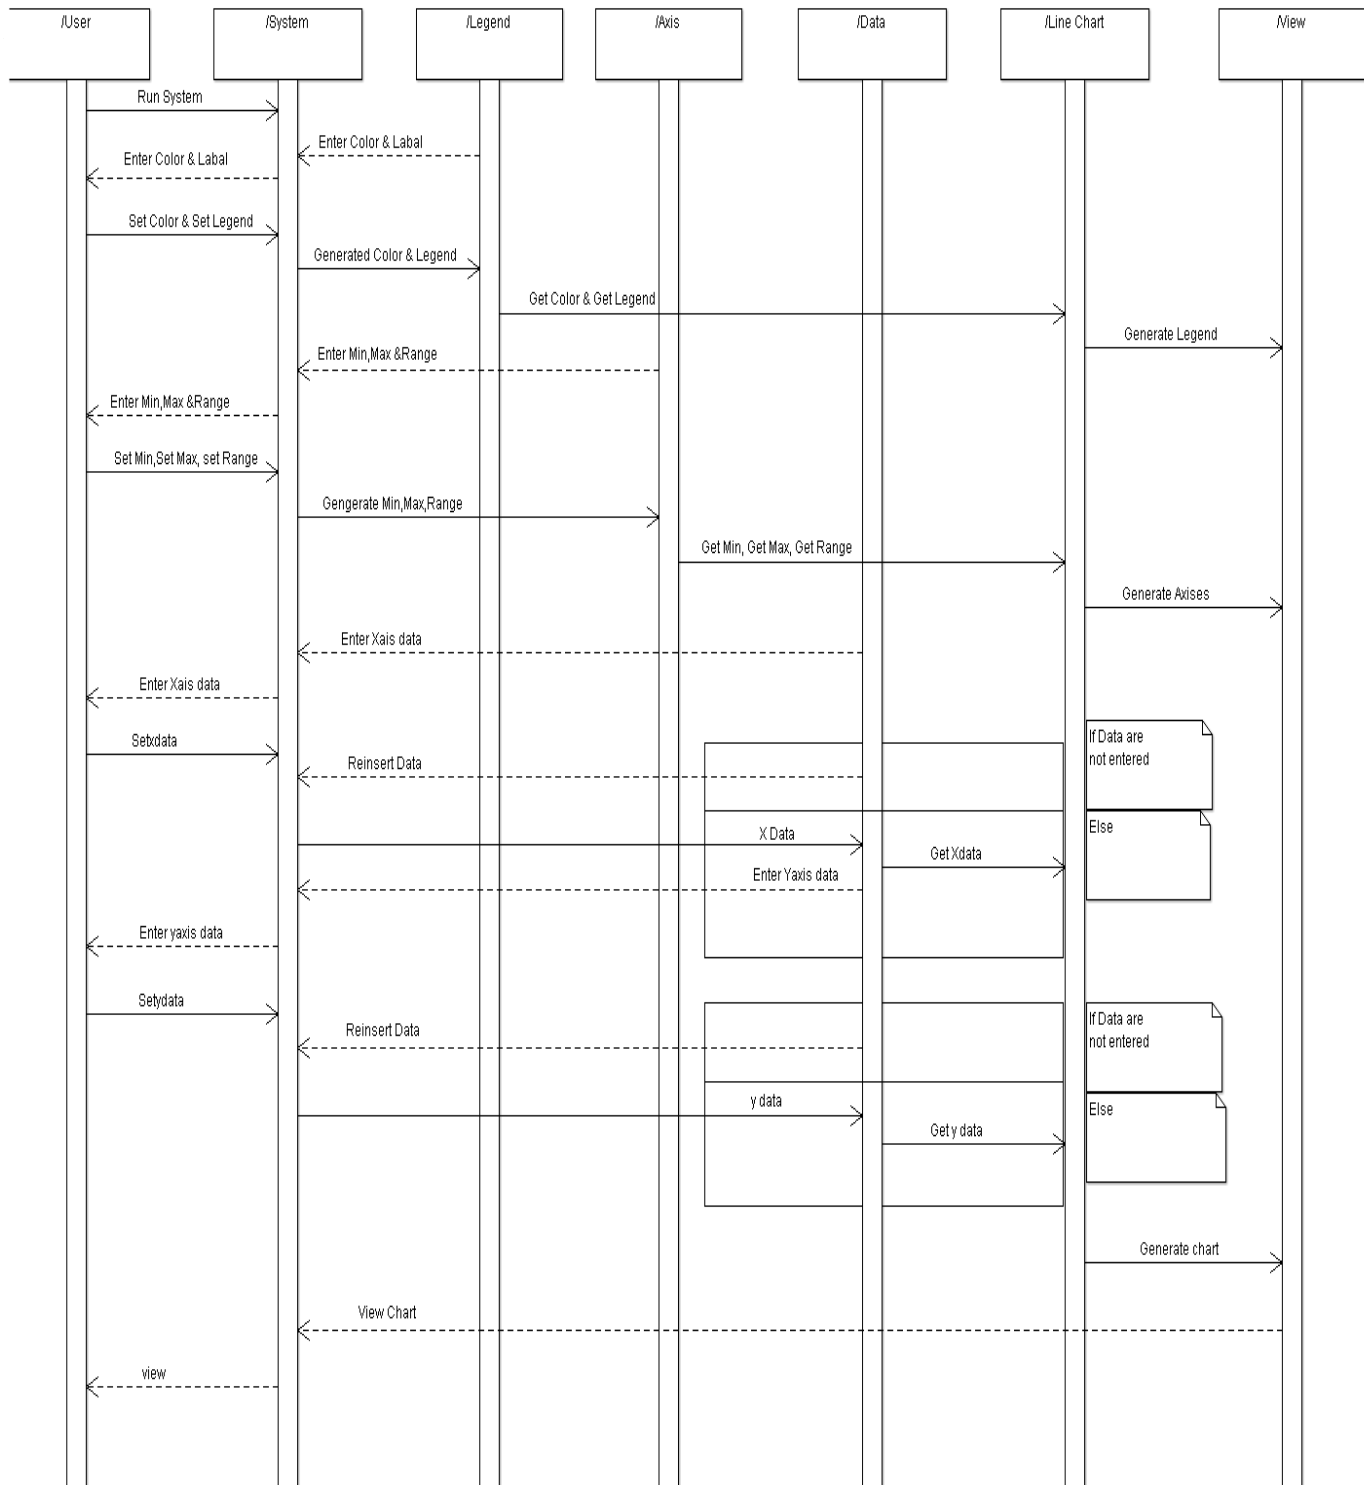

1. **A class diagram:** to describe the structure of our app by showing the application classes, attributes, methods, and the relationships among objects.
 2. **A sequence diagram:** is an event (interaction) diagram we made it to show how processes operate with one another and in what order.
And it shows object interactions arranged in time sequence.
It describe the objects and classes involved in the scenario and the sequence of messages exchanged between the objects needed to carry out the functionality of the scenario.
 3. **A cohesion & coupling:** is a graphic relationship between models and show each model parameters.
 4. **A use case diagram:** is a graphic depiction of the interactions among the elements of a system. A use case is a methodology used in system analysis to identify, clarify, and organize system requirements.
